

Mountain Valley Electric Co.

Servisavor Installation Agreement

It has been determined by a Mountain Valley Electric Company crew that your customer-owned underground power cable has failed. Since the secondary underground power lines are under the jurisdiction of the State Department of Labor and Industries, only licensed electricians or the homeowner are permitted to repair or replace the cables.

Mountain Valley Electric Company offers, as a courtesy to its members, the opportunity to provide limited emergency power to your home when it is determined that your underground power cables need to be repaired or replaced. We have equipment called a Servisavor that can be installed to restore limited power to your meter while you find a licensed electrician to make the repairs. By signing this document below, you are agreeing to the terms and conditions of the installation as follows:

1. The power available is limited to 62.5 amp, 15 Kva. This means that you agree to reduce your electrical load if the Servisavor breaker trips or if you experience any low voltage problems.
2. The Servisavor is available to you for a limited time of seven (7) calendar days. This means that you agree to hire a licensed electrical contractor to repair or replace your underground cables within that time.
3. Please contact our Operations Department at (970) 555-1556 immediately if:
 - a) You have hired an electrical contractor and the repairs cannot be completed within the 7 days.
 - b) You are unable to find an electrical contractor willing to perform the work and need our assistance.
4. The Servisavor is Mountain Valley Electric Company property and is valued at approximately \$5,000.00. You agree to pay all costs associated with the repair or replacement of this equipment if it is vandalized or intentionally damaged.

I acknowledge and agree to the terms and conditions as stated in this document and hereby authorize Mountain Valley Electric Company to install its Servisavor on my property:
